PROFILE

Who graduated from the engineering department and pursued with MBA in the International business management field. I used to work as an import and export manager for international companies. Since the Covid-19 restriction, I kicked my career in the tech field. I've been on a self-learning-to-code journey for a year and looking forward to speeding up this process within a supportive and friendly environment with an intensive bootcamp. I have improved my basic coding skill for HTML and CSS, while still trying to get further knowledge of blockchain and web3 applications of my interests. Therefore, I made a switch and start the software development bootcamp with Makers.

SKILLS

Attention to detail | Problem solving | Advising and Influencing | Collaborating with others | Time Management

PROJECTS

DIVVY, *Bill splitting mobile app (Final project)*

React, Javascript, Node, Expo, Realm, Taggun

AceBook - Axylotls, *An experimental facebook clone.*

JavaScript & NodeJS, Handlebars, MongoDB & Mongoose, HTML & CSS
Heroku, Cypress

Chitter, *Twitter clone*

Ruby, Sinatra, Postgres /w DataMapper, HTML5(ERB), Bootstrap CSS, RSpec

MakerBNB, *An Airbnb Clone*

Node.js, Express, CSS, HTML

Bank tec test,

Bank Test A simple bank simulator application which is allows the user to deposits, withdraw funds and view their account statement.
