PROFILE

I graduated from the engineering department and pursued with MBA in the International business management field. I used to work as an import and export manager for international companies. Since the Covid-19 restriction, Ikicked off my career in the tech field from a mechanical engineer to a full stack software developer!

I have a passion for writing clean, test-driven code and am excited to start this new chapter of my professionalcareer, utilising the skills and approaches I've developed from my engineering backgrounds, such as creative solutions to problem-solving, time management and attention to detail. Due to this, I switched to Makers and started an intensive software development bootcamp. Through Makers Academy, I have learned OPP languages (Ruby and JavaScript) how vital planning and teamwork with the agile method are to building a quality product, and thefundamentals of solid TDD practice. Additionally, software development has given me a deeper appreciationmaking me more motivated to pursue the SDET software testing process.

My goal is to explore as much as possible about Software testing and then transfer into a specialized blockchainand Web3 applications developer role.

🎨 SKILLS

Attention to detail | Teamwork | Communication | Problem solving | Testing | Time management | Creativity

---

📂 PROJECTS

DIVVY, *Final project at Makers, a mobile app that helps you work out how to split restaurant bills between friends*
React Native, JS, Node, Expo, Realm, Taggun

- Users can itemise each receipt (taggun-image recognition)
- The app can use, without an internet connection, data stored locally (Realm)
- Used Expo for Cross-platform simulation efficiency on React Native mobile app

AceBook - Axylotls, *An experimental facebook social media web application.*
JavaScript & NodeJS, Handlebars, MongoDB & Mongoose, HTML & CSS Heroku, Cypress

- User authentication,
- User walls, where users could add posts and then edit or delete their posts
- Users can comment on posts and then edit or delete their comments
- Users can like posts without page not refresh

MakerBNB, *Building a short-term rental website for travellers going away*
Ruby, Sinatra, Rack, PreSql, Rspec
- User authentication.
- List properties with availability dates.
- Rent properties with booking requests.
- Manage your property portfolio by confirming or denying booking requests.

Chitter, *Build similar to Twitter application*
Ruby, Sinatra, Postgres /w DataMapper, HTML5(ERB), Bootstrap CSS, RSpec

Bank Tech Test,
Bank Test A simple bank simulator application which is allows the user to deposits, withdraw funds and view their account statement.
Ruby, IRB, Rspec, JavaScript, Jasmine

🎨 TECH STACK

- JavaScript (React, Node.js, Express, MongoDB, jQuery, Jest, React Native, Cypress, Expo)
- Ruby (Rails, Sinatra, RSpec)
- Java
- SQL (PostgreSQL, TablePlus)
- MongoDB (Realm)
- HTML, CSS (Bootstrap, Material-UI, Materialize)
- Heroku, Netlify, Figma, Miro,Trello, Jira(Zephyr Scale)
  Git, GitHub (including Pages and Actions), GitLab Engineering Information: Ansys, SolidWorks, AutoCAD, Pro Engineering, Catia.

💼 PROFESSIONAL   EXPERIENCE

Sale Manager, *VR System Solution* ⎋
VR Promotion Applications
VR Occupational Safety Applications
Practical knowledge-oriented VR
applications Orientation applications

Oct 2020 – present
London, UK

Full-Stack Developer, *Otherlink* ⎋

Digital receipt IoT device, testing and adding new
features Developing front-end and back-end architecture
Ensuring responsiveness of applications

present
London, UK

🎓 EDUCATION

Java SDET Software Tester Bootcamp, *Cydeo Academy and QA Bootcamp UK*
- Basic Java core concept.
- Test automation framework using Java.
- TestNG (unit, integration and end-to-end testing).
- Selenium WebDrive automation, API testing and CI/CD integration/deployment testing.

Feb 2023 –
USA and UK

Intensive Full Stack Software Engineering Bootcamp, *Makers Academy*
- Training for 16-weeks full-time with a leading European software development bootcamp, focusing on TDD (test-driven development), daily pair programming and Agile practices.
- Used creativity and strategic thinking to create applications in several OOP languages, including Ruby, Java & JavaScript.
- Through an analytical approach, carried out the extensive practice of TDD principles using RSpec, Jasmine, Jest & Cypress.
- Applied architectural patterns including MVC and DDD.
- Learnt and applied Agile project management principles using GitHub, Miro and Trello.

Jun 2021 – Oct 2021
London, UK

Master for International Business Management, *UWIC (University of Wales)*
- Leadership/Management/Negotiation
- Teamwork
- Strategic Thinking
- Solve complex problems
- Research and analysis

2010 – 2011
London, UK

Mechanical Engineer, *University of Balikesir(BAU)*
- Process-driven
- Attention to details
- Problem-solving skill
- Project-based teamwork
- Critical thinking
- Leadership

2001 – 2005
Turkey
